- Three Catholic families were converted and the new church is strengthened as it now understands the joy of working as a team
- A Bible seminar for the different congregations gathered 60 people to learn important concepts in

reaching the Hindus and Buddhists; participants valued the tests and memory work requirements

- Printing was completed on our Sinhala correspondence course and 27 students have already enrolled
- The real harvest will start when government travel restrictions are relaxed and we reach the up country to meet people whom we estimate are ready to receive and appreciate the Gospel
- The common people in Sri Lanka are really looking for a better Savior as their gods have failed to bring peace in their lives; their religions haven't help them understand who they are, where they came from, and where they are going so they eat, drink, and fear for their life from their enemies
- We received 12 new responses and three previous responses; one Buddhist family started coming to the church worship and Bible seminars
- Our target for the next three or four years is to develop at least four to five churches to go on their own ministry in their land
